Emotion-Aware Intelligent Environments

Message from the Guest Editors

Dear colleague, Emotion-aware ambient intelligence extends the notion of intelligent environments to detecting, processing, and adapting intelligent environments to users' emotional state, exploiting theories from psychology and social sciences for the analysis of human emotional context. Considering emotions in the user context can improve the customization of services in IoT scenarios and help users to improve their emotional intelligence. However, emotion technologies are rarely addressed within Aml systems, and have been frequently ignored. We are organizing the conference Intelligent Environments 2020 (<https://blogs.upm.es/ie2020/>), and our idea would be to recommend extended versions of selected papers of the conference for this Special Issue, in addition to papers submitted by researchers.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
