

## Special Issue

# New Trends in Endodontic Materials and Clinical Endodontics

### Message from the Guest Editor

We thereby invite authors to submit their works to this Special Issue “New Trends in Endodontic Materials and Clinical Endodontics”, which will describe recent research and developments in the field. The main objective of this Special Issue is to present new technologies, products, and techniques aiming at increasing the interest and knowledge in clinical endodontics, and improving quality of treatments. Both in vitro and clinical research will be highly appreciated, including case reports/series concerning innovative procedures and the use of new products related to diagnosis, root canal treatments, surgical and non-surgical retreatments, and post-endodontic restorations. Reviews can also be submitted provided the topic is clinically relevant in the field of endodontics. We also welcome expertise that is creative and interdisciplinary in a way that combines principles of new technologies and clinical procedures. Interdisciplinary original research underlying any specific solutions that address the issues mentioned above will be considered suitable for this Special Issue.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (Fluid Flow and Transfer Processes)
