

## Special Issue

# Energy, Resources and the Environment

### Message from the Guest Editors

A major challenge for humankind is to provide adequate and reliable supplies of affordable energy and tangible resources. These should be obtained in environmentally sustainable ways, which is essential for economic prosperity, environmental quality, and political stability around the world. With this Special Issue we would like to provide a holistic view on activities relating to the development, assessment, and management of energy-related programs, and to provide a forum for the presentation of fundamental scientific advances and engineering developments in the understanding of resources systems. This can also cover aspects of the environmental impacts of socio-economic development. This includes any combination of theoretical, computational, or experimental approaches.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

---

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo  
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,  
20133 Milano, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
