

Special Issue

Energy System Restructuring and Deregulation in a Smart City Environment

Message from the Guest Editors

This Special Issue is devoted to energy system restructuring and deregulation in a smart city environment. The recent advancement of information technology and operational technology should especially be seamlessly converged for achieving a higher degree of operational excellence of energy systems. In this Special Issue, we invite submissions exploring cutting-edge research and development of energy system solutions toward a smart city. Both theoretical and experimental studies are welcome, as well as review papers and application reports.

- renewables integration
- energy market
- internet of energy
- cyber-physical-societal system
- planning and digitalization
- optimization and control

Guest Editors

Dr. Zhiyi Li

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
