

Special Issue

Noise Pollution and Environmental Sustainability

Message from the Guest Editors

The Applied Sciences special issue aims to provide a forum for discussing the current impact of environmental noise on the shaping and management of urban and suburban areas and human well-being (with particular emphasis on the pandemic effects), learning and economic impacts of noise exposure and an overview of possible solutions to prevent this type of pollution. Innovative conceptual and empirical approaches will be methodologically accepted.

Interest's topics:

- Environmental noise research evolution;
- Sustainable shaping of the acoustic environment in urban and suburban areas;
- The soundscape shaping with the legislation;
- Acoustic solutions preventing exposure to excessive noise;
- Environmental noise and the area attractiveness;
- Environmental noise and sustainable urban transport;
- Social and economic effects of exposure to excessive noise;
- Environmental noise and its post-pandemic impact on human well-being.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
