

Special Issue

Advances in Edible Oil Processing and Quality Characterization

Message from the Guest Editors

This Special Issue aims to highlight advances in conventional and emerging processing techniques, such as cold pressing, refining optimization, enzymatic processing, and novel physical technologies, as well as modern analytical approaches for assessing oil quality, safety, and functionality. Particular emphasis is placed on understanding the relationships between processing conditions, chemical composition, physicochemical properties, and nutritional characteristics of edible oils. We are pleased to invite researchers and practitioners to contribute to this Special Issue, which aims to present recent scientific and technological progress in the production, processing, and quality assessment of edible oils.

Research areas may include (but are not limited to) the following:

- Innovative and sustainable edible oil processing technologies.
- Quality characterization, authenticity, and adulteration detection.
- Oxidative stability, shelf life, and safety assessment.
- Nutritional, functional, and sensory properties of edible oils.

We look forward to receiving your valuable contributions.

Guest Editors

Dr. Edyta Symoniuk
Prof. Dr. Małgorzata Wroniak
Dr. Katarzyna Ratusz

Deadline for manuscript submissions

20 October 2026

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (Fluid Flow and Transfer Processes)
