

Special Issue

Frontiers in Nanocomposites: Fabrication, Characterization and Applications

Message from the Guest Editors

This Special Issue of Applied Sciences, “Frontiers in Nanocomposites: Fabrication, Characterization and Applications,” has the aim of collecting recent advances in the field of nanocomposites, or hybrid materials, containing inorganic nanostructures (metallic, ceramic, carbon-based), their fabrication through bottom-up and top-down routes, surface modification with polymers or other inorganic nanomaterials, processing, resultant microstructural and functional characterization for the intended application (in any scientific and technological area). We invite researchers and investigators to contribute their original research, or review articles, to this special issue. If you are interested, you can submit your work directly via the following link:

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
