

Special Issue

Functional Dairy Products

Message from the Guest Editor

The thematic scope of the Special Issue includes dairy products derived from the use of lactic acid bacteria and probiotic microorganisms or dairy products containing functional ingredients. *in vitro*, *ex vivo*, or *in vivo* research studies; research on fermented or unfermented dairy products; research on the use of lactic acid bacteria or probiotic strains in dairy production; research on the survival rate of probiotic microorganism cells; research on products containing bioactive ingredients; their impact on quality, durability, or health promoting properties; as well as issues of legal regulations for functional foods are equally interesting to us. We are interested in innovative issues or research with an innovative approach in the given thematic scope.

Prof. Dr. Małgorzata Ziarno

Keywords

functional food
fermentation
lactic acid bacteria
probiotic
bioprotection
bioactive components
quality
shelf life
health promoting properties

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
