

Special Issue

Advanced Structural Analysis for Earthquake-Resistant Design of Buildings: 2nd Edition

Message from the Guest Editors

This Special Issue intends to collect recent research contributions on the seismic response of structures, from method investigations to noteworthy case studies. The novel methods will include structural analysis methods and numerical modelling approaches for the seismic design and assessment of buildings based on deterministic and probabilistic approaches. Original contributions containing fundamental and applied research, case studies, or state-of-the-art reviews are encouraged to be submitted to this Special Issue.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
