

## Special Issue

# Bioorganic Chemistry and Medicinal Chemistry

### Message from the Guest Editor

This Special Issue will comprise research and review articles focusing on bioorganic chemistry, which concerns the biological processes of organic compounds, as well as medicinal chemistry, which addresses the design, synthesis, and biological evaluation of new compounds. Since these two domains overlap, this Special Issue welcomes all novel ideas and compounds that influence biological systems in terms of the design and development of new medicines, as well as new ideas regarding disease pathomechanisms.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
