

Special Issue

Natural Products: Biological Activities and Industrial Applications

Message from the Guest Editor

Nowadays, natural products and their composition have been a hot topic of discussion among different communities. In addition, their interest along with consumers is increasing worldwide, not only because of their economical value and facilities of operation, but also because of their belief that they offer any, or less, unwanted effects than chemical drugs. Given that, it is not surprising that many studies have been conducted in order to explore the total biological potential and different applications. This Special Issue will publish high-quality, original research and review papers in the overlapping fields of: (1) Biological potential of plant extracts, alone or combined with other active ingredients and/or pharmaceuticals; (2) Strategies and new technologies to enhance the biological potential of plant extracts, e.g., their (nano)encapsulation with liposomes, in health and industry companies; (3) The structure–activity relationship between the biological activity and content; (4) Health-promoting properties and practical use of natural products and/or their composition.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
