Special Issue

Deep Learning for Speech Processing

Message from the Guest Editors

With the development of deep learning technologies, their performance is continually improving in many application areas; in some fields, it is similar to or even surpasses human performance. We have also started to observe this progress in the field of speech processing. Numerous research papers are published every year not only for traditional classification problems but also for the generation problems in the speech processing area. This Special Issue will be dedicated to state-of-the-art research articles as well as tutorials and reviews in the rapidly evolving field of deep learning for speech and language processing.

Guest Editors

Prof. Dr. Dongsuk Yook

Prof. Dr. Alexey Karpov

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

Author Benefits

Open Access:
free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:
indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:
JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
