

Special Issue

GPS/GNSS Observations in Geodynamics and Environment

Message from the Guest Editor

GPS technology is currently used in everything from cell phones and precision watches to bulldozers, marine vessels, and even ATM machines. It is vital for the next generation of the air transport system, which should contribute to improving flight safety while increasing airspace capacity, and is also necessary for solving scientific and practical problems, such as weather forecasting, earthquake monitoring, solving a number of tectono-geodynamic problems, and environmental protection. This Special Issue is devoted to all possible applications of the GPS-GNSS system, which is an important element of the global information infrastructure. Free and reliable access to the GPS-GNSS system has led to the development of hundreds of applications that affect every aspect of modern life.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
