

Special Issue

Advances in Animal Production and Meat Science

Message from the Guest Editors

We are pleased to announce this Special Issue in Applied Sciences, dedicated to showcasing cutting-edge developments in animal agriculture and meat science. This Issue aims to highlight innovative research in animal breeding, nutrition, health management, welfare, and sustainable production, as well as advances in meat quality, processing, preservation, and safety. We invite original research articles, reviews, and methodological studies that address genetic improvement, feed efficiency, precision farming, and the influence of management practices on both animal performance and meat characteristics. Contributions that present original insights, novel technologies, or data-driven approaches to enhance productivity, sustainability, and product quality are particularly encouraged. This Special Issue provides a platform for researchers to share their findings, foster scientific collaboration, and advance the understanding of the complex interactions between animal production systems and meat quality. We look forward to receiving high-quality submissions that extend the boundaries of knowledge and contribute to evidence-based practices in the field.

Guest Editors

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
