

Special Issue

GeoAI Data and Processing in Applied Sciences

Message from the Guest Editors

The objectives of this Special Issue are to create a multidisciplinary forum of discussion on recent advances in the research fields of GeoAI for applied sciences and to find new techniques and applications in geospatial sciences and engineering, applied geology, applied biology, applied ecology, applied hydrology, applied environmentology, etc. Potential topics include, but are not limited to:

- GeoAI data product
- Validation of GeoAI data product
- GeoAI data processing
- Model development for GeoAI data
- Modeling and mapping using GeoAI data
- Change detection, target detection and target recognition using GeoAI data
- Applications and innovative use of GeoAI data for geospatial sciences and engineering
- Applications and innovative use of GeoAI data for remote sensing
- Applications and innovative use of GeoAI data for geoscience information system
- Applications and innovative use of GeoAI data for applied geology/applied biology/applied ecology, applied hydrology, applied environmentology.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
