Special Issue

Applications of Geometric Morphometrics and Computational Imaging

Message from the Guest Editors

Geometric morphometry (GM) is the shape statistical analysis based on Cartesian coordinates (landmarks) that allows structural data to be quantified and the variation between morphologies to be studied by analyzing their position in space. GM is presented as an alternative to traditional methods for morphological studies through more descriptive and qualitative analyses. With this technique, a new updated toolbox is shown for the study of variations in size and shape, using advanced statistics and a series of tools for the visualization of results. The topics of interest of this Special Issue include but are not limited to the following:

- Geometric morphometry
- Statistical analysis
- Computer vision
- Machine learning and Deep Learning
- Biological anthropology
- Biological Science
- Medicine
- Paleontology

Guest Editors

Dr. Miguel Angel Maté-González

Departamento de Ingeniería Cartográfica y del Terreno, Universidad de Salamanca, 37008 Salamanca, Spain

Dr. Julia Aramendi

McDonald Institute for Archaeological Research, Department of Archaeology, University of Cambridge, Cambridge CB2 3DZ, UK

Deadline for manuscript submissions

closed (30 September 2023)

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
