

## Special Issue

# Geotechnical Engineering Hazards

### Message from the Guest Editor

This Special Issue focuses on the hazards associated with geotechnical engineering and invites submissions that exploit state-of-the-art research, case studies, and lessons learned through failures, including but not limited to rock and soil slope stability analysis and monitoring, identification and treatment of problematic soils, settlement problems, earthquake-induced geotechnical hazards, problems associated with the presence of water, geotechnical hazards at offshore facilities, and geotechnical hazards associated with climate change. Submissions using analytical, spatial, mathematical, and numerical methods and physical modeling, as well as comprehensive review studies, are welcome.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

---

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo  
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,  
20133 Milano, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
