

## Special Issue

# Graphene Growth and Its Nanostructuring

### Message from the Guest Editor

This Special Issue will cover a selection of original research and review articles related to graphene and nanostructuring, focusing primarily on the following topics:

- Emerging of graphene and graphene oxide processing;
- Graphene and biomedical engineering;
- Graphene and smart polymers;
- Graphene and biosensors;
- Graphene and supercapacitors;
- Environmental applications of graphene-based nanomaterials.

We look forward to receiving your contribution to this Special Issue, which we have no doubt will be as excellent as your previous work in the field.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
