

## Special Issue

# Toxicity of Chemicals: Evaluation, Analysis and Impact—2nd Edition

### Message from the Guest Editors

We are pleased to announce the second edition of this Special Issue exploring chemical toxicity. Chemicals that enter the market have been previously evaluated following the REACH regulation; however, in many cases, it is necessary to carry out extensive analysis to examine the potential effect of these compounds on human health. For this, it is rather important to conduct studies on the toxicity, genotoxicity, or toxicokinetic profiles, among others, of these chemicals. In this Special Issue, we invite papers focused on uncovering the toxicity of chemicals using different experimental evaluations and prediction methods.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo  
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,  
20133 Milano, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
