

## Special Issue

# Systems Biology Approaches to Cancer Molecular Networks

### Message from the Guest Editor

Identification of informative biomarkers in cancer research is of importance for all the stages of disease management—early detection, screening, treatment, etc. This Special Issue focuses on the use of advanced molecular technologies and systems biology to understand cancer biology, improve diagnostics, and guide precision therapies. It highlights how molecular profiling can uncover mechanisms of tumorigenesis, identify reliable biomarkers, and enable targeted and precision medicine approaches. It highlights how genetic profiles, liquid biopsies, and integrative molecular approaches are transforming cancer research and clinical practice.✉

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
