Advanced Studies in Orthodontics

Message from the Guest Editor

Orthodontics is a dental science that is continuously evolving. Digital treatment planning, clear aligners, AI, and 3D evaluation during the diagnostic process constitute only a few of the topics that have been growing quickly in recent years. Remaining updated about progress in orthodontics is essential in being well educated about diagnostic methods and treatment options. Indeed, I think that it is important to publish research papers that are useful for explaining news on studies, data, and results to colleagues in the field. Furthermore, I am very pleased to introduce this Special Issue “Advanced Studies in Orthodontics”: it represents a great opportunity to expand knowledge, results, and new concepts about orthodontic clinical practice and basic research. Feel free to send your research papers to the Special Issue. It is as a special professional opportunity!

Guest Editor

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
