

## Special Issue

# Trends and Prospects in Intelligent Automotive Systems

### Message from the Guest Editor

Transportation systems play important roles in modern society, especially during the process of urbanization. In recent years, new technologies, including artificial intelligence (AI) and big data, have promoted the rapid development of intelligent transportation systems. Methodologies involving design, modeling, control and testing are emerging, and such innovations greatly improve the efficiency and safety of existing transportation systems. Therefore, this Special Issue aims to gather research advances in intelligent transportation systems. Potential topics include but are not limited to:

- Machine learning;
- Advanced control algorithm;
- Advanced data processing;
- Simulation;
- System integration and testing.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

---

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo  
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,  
20133 Milano, Italy

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
