

## Special Issue

# Advances in Intelligent System and Internet of Things

### Message from the Guest Editor

You are encouraged to submit articles discussing the intelligent system and Internet of Things. With the rapid development of computer science and technology, intelligent systems and Internet of Things engineering has become a hot topic. The application of intelligent systems is one of the major advances in artificial intelligence. The Internet of Things project can realize the ubiquitous connection between things and things, things and people, and realize the intelligent perception, identification and management of things and processes. The Special Issue “Advances in Intelligent System and Internet of Things” aims to design and implement various research outcomes, intelligent systems and other Internet of Things (IoT) applications fused with artificial intelligence (AI). In this Special Issue, original research articles and reviews are welcome. Research areas may include (but are not limited to) the following:

- Internet of Things;
- Intelligent Systems;
- Ubiquitous Connection;
- Intelligent Connection;
- Artificial Intelligence.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
