

Special Issue

Current Trends and Applications of Polymer Composites

Message from the Guest Editors

Advanced composite materials are fundamentally changing modern engineering and technology thanks to their unique properties, including lightweight durability, high strength-to-weight ratios, and multifunctionality. This Special Issue, focused on polymer composite materials and their latest developments in various fields, highlights new methods and ideas for their preparation, performance characterization, successful application, and potential in aerospace, automotive, biomedical devices, sustainable construction, electronics, and energy storage. We hope that, through this Special Issue, scholars can engage in wide-ranging, beneficial exchanges of knowledge. We look forward to your contributions.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
