# **Special Issue**

# Hyper- and Multi-Spectral Imaging

## Message from the Guest Editor

Spectral Imaging (SI) combines the advantages of both imaging and spectroscopy (high spatial and spectral resolution) in a single instrument. In SI, light intensity is recorded as a function of both wavelength and location. The output is a three-dimensional data structure known as spectral cube, with each pixel representing the spectrum of the scene at that point. Most recent developments include snapshot or single exposure SI cameras, which capture the images of the spectral cube simultaneously or, alternatively, spectral cube streams at nearly video rates. Dynamic SI implies that light intensity can now be recorded as a function of time, wavelength, polarization, two or more spatial locations, etc. We invite investigators to contribute original research articles, as well as review articles, that will stimulate the continuing efforts in the field of SI. Keywords: Hyper-Spectral Imaging: Multi-Spectral Imaging; Snap-Shot Spectral Imaging; Spectral Cube Data Analysis/Processing; Biomedicine; Remote sensing; Microscopy; Non-Destructive Testing

# About the Journal

# Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

#### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32, 20133 Milano, Italy

## **Author Benefits**

### **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

## High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
