

Special Issue

Three-Dimensional Imaging of Cardiovascular System

Message from the Guest Editors

The aim of this Special Issue is to provide a full, comprehensive, and exhaustive overview of the application of three-dimensional techniques in cardiovascular imaging, the state of art regarding this technique, indications regarding their use in daily laboratory practices, and the future developments of such an approach. Topics of interest include but are not limited to:

- three-dimensional imaging
- cardiovascular imaging
- echocardiography
- peripheral vascular ultrasound
- preventive cardiology
- accuracy

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
