

Special Issue

Indoor Air Quality

Message from the Guest Editor

It is a fact that people in developed countries spend almost 90% of their time indoors, where they experience their greatest exposures. However, regulation for air pollution focuses on outdoor air, as indoor environment is less well-characterized and recognized as a potential location for exposure to air pollution. The Special Issue invites research in the areas of the triptych: *indoor air pollution monitoring*, *indoor air modeling*, and *exposure to indoor air pollution*. Topics of interest for the Special Issue include, but are not limited to, the following:

- Low-cost sensors for indoor air monitoring
- Indoor particulate matter and volatile organic compounds
- Ozone-terpene chemistry
- Biological agents indoors
- Source apportionment
- Exposure assessment
- Health effects of indoor air pollutants
- Occupant perception
- Climate change impacts on indoor air quality

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
