

## Special Issue

# Advances in Industrial Waste Reduction

### Message from the Guest Editors

Industry is an integral part of the economic activity of any country. It may be divided mainly into primary and secondary, where there is also the tertiary sector focusing on services and intellectual services industry. The primary sector is concerned with the extraction of raw materials. It includes fishing, farming, forestry, minerals extraction, and mining. These activities produce large amounts of waste, with a high environmental impact. Their impact also depends on the economic status of the country in which the infrastructures are operating. The secondary sector of the economy includes industries that produce a finished, usable product, or are involved in construction. This sector, generally, takes the output of the primary sector and manufactures finished goods that are suitable for use by other businesses, for export, or sale to domestic consumers. This sector is often divided into light and heavy industry. With reference to the water, the Special Issue is focused both on the problem of water contamination and on water waste.

---

### Guest Editors

Prof. Dr. Constantinos S. Psomopoulos  
Prof. Dr. Athanasios Kungolos  
Prof. Dr. Armando Di Nardo

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
