

Special Issue

Exploration, Selection, Transportation and Analysis of Space Materials

Message from the Guest Editors

The investigation of issues related to the selection, transportation, and analysis of space materials has been strongly pushed by recent sample return missions (e.g., OSIRIS-REx, Chang'e program, Hayabusa2, Tianwen2) and other missions under study. This has also allowed us to deepen our knowledge about the analysis techniques and transportation of meteorites. We are pleased to invite you to submit a paper to this Special Issue, which aims to give an overview of recent efforts in the exploration, selection, transportation, and analysis of space materials.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
