Advances in Motion Monitoring System

Message from the Guest Editor

Motion data collection during sports is crucial for athletes, coaches, and healthcare professionals to gather valuable sports information. Detailed information on athletes and their workout habits is vital for improving training programs and optimizing athletic performance. The recent surge in motion monitoring devices has driven technological advancements in this field, offering innovative solutions. Motion monitoring systems integrate these devices with advanced back-end processing solutions to expedite the analysis and identification of exercise data, streamlining the motion monitoring process. This journal aims to present a comprehensive examination of the latest developments in motion monitoring systems, encompassing technological innovations, practical applications, and future prospects. The editorial board welcomes researchers from various fields and disciplines to submit original research, reviews, case studies, and technical reports.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
