

## Special Issue

# Recent Developments and Emerging Trends in Dental Diseases and Dental Materials

### Message from the Guest Editor

The introduction of increasingly high-performance dental materials with highly bioactive and biofunctional characteristics makes these products increasingly interactive with the dental tissues of the host. These activities can sometimes cause dental pathologies that could be difficult to resolve. The objective of this Special Issue is to present research on the use of most current dental materials to prepare clinicians on the correct choice of material personalized for the patient to avoid unwanted effects and to not only establish the correct protocols for the use of dental materials but also be aware of suitable procedures to deal with and resolve adverse events.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
