Constructive Design and Technological Optimization in Machine Building: Latest Advances and Prospects

Message from the Guest Editors

Nowadays, production and manufacturing are undergoing important transformations driven by the latest advancements in technology and innovative design approaches. In an era defined by rapid technological evolution and increasing global competition, the machine building industry represents a cornerstone of economic progress and societal advancement. This Special Issue, entitled "Constructive Design and Technological Optimization in Machine Building: Latest Advances and Prospects", will bring together contributions from experienced academicians, researchers, engineers, and industry professionals at the forefront of technological innovation.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
