

Special Issue

Recent Advances in Fatigue and Fracture of Engineering Materials

Message from the Guest Editors

The aim of this Special Issue is to collect and share with a wide community of researchers the results of scientific research, addressing the recent advances in fatigue and fracture of materials. It will cover a wide range of topics including: the phenomena accompanying the process of crack initiation and propagation, the influence of different factors on fatigue life, development of approaches in fatigue life estimation, description of failure mechanisms, description and analysis of fracture surfaces, the influence of residual stresses on cracking, effect of microstructure, texture, and grain boundaries on fatigue life, and others. Thus, we invite the researchers working in the described area to present their latest results in the form of original research and review articles. Papers that present experimental results are highly appreciated, as well as those that focus on numerical techniques for fatigue life assessment.

Guest Editors

Dr. Tomasz Ślęzak
Dr. Robert Kosturek
Dr. Krzysztof Grzelak

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
