

Special Issue

Microalgae-Derived Bioactives for Cosmetic and Biological Applications

Message from the Guest Editors

The aim of this Special Issue is to provide recent reviews and research articles on bioactive compounds produced by microalgae, highlighting the production, extraction, and purification methods; their characterization and their potential applications in the cosmetic field; and other biological applications, such as ingredients for nutraceuticals and other human health products for skin care. Topics relevant to the SI include the following:

- Microalgae production, extraction, and purification.
- Microalgae bioactive compounds in cosmetics and skin care: moisturizing, anti-ageing, antioxidant, and protective activities.
- Microalgae bioactive compounds in nutraceuticals.
- Microalgae bioactive compounds with anti-inflammatory, antimicrobial, and wound healing activities.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
