

## Special Issue

# Big Data Delivery, Management, and Analysis over IoT

### Message from the Guest Editors

The world has changed. New technologies, new trends, new protocols, new efficient algorithms, and systems have been used widely by civilized countries to have better and more convenient living. As applications based on “Internet of Things” (IoT) have been used widespread in every sector, many research studies provide useful information about new trends in IoT, the issues that they cause, some solutions that already exist, and various challenges that need to be solved in order to gain the benefits of Internet technology. Moreover, “Artificial Intelligence” (AI) is a technological advance that provides various solutions to various issues, which are based on the efficient delivery and security of Big Data, by taking into consideration the energy consumption and the complexity of the algorithms. ## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

---

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo  
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,  
20133 Milano, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
