Recent Trends in Atherosclerosis and Related Diseases

Message from the Guest Editor

Atherosclerosis is a progressive disease characterized by the accumulation of lipids and fibrous elements in the large arteries, and it is the primary cause of coronary artery disease (CAD) and stroke. Atherosclerosis is a disorder with multiple genetic and environmental contributions. Deepening our knowledge of the mechanisms that cause atherosclerosis is the focus of this Special Issue. **Keywords**

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
