

Special Issue

Renewable Energy 2018

Message from the Guest Editor

The is inviting submissions for a Special Issue of Applied Sciences on the subject area of “Renewable Energy 2018”. This Special Issue deals with recent state-of-the-art technology for renewable energy. These technologies increase the introduction of renewable energy in the world. This Special Issue will focus on renewable energy and its applications. Topics of interest for publication include, but are not limited to: • Wind energy;

- Solar energy;
- Tidal energy;
- Wave energy;
- Biomass energy;
- Energy storage;
- Energy transportation;
- Electrical power transmission;
- Energy distribution;
- Energy conversions;
- Control technique for renewable energy;
- Optimization technique for renewable energy;
- Reduction of CO₂ emission;
- Economic issues in renewable energy;
- Hydrogen production from renewable energy.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
