Cancer Therapies: New Insights into Photodynamic Therapy and Photodynamic Diagnosis

Message from the Guest Editor

Photodynamic therapy (PDT) emerged as a tumour-specific and non-invasive treatment modality for cancer around the 1980s. PDT is considered a promising approach for local cancer treatment because of its unique advantages such as minimal invasiveness, and spatiotemporal modulation. This Special Issue aims to present the latest research in the field of PDT for cancer, including new developments in photosensitizer design and delivery, advances in imaging techniques, and clinical trials. The articles highlight the potential of PDT as an effective and minimally invasive treatment option for various types of cancer. With ongoing research and development, PDT has the potential to significantly improve cancer outcomes and enhance patients' quality of life. In summary, this Special Issue provides a valuable opportunity for researchers to share their latest findings and insights in this field. For those interested in submitting their work for consideration, this issue provides important guidance on the key areas of focus in this field and highlights potential areas for future research.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
