

## Special Issue

# Land Subsidence: Monitoring, Prediction and Modeling

### Message from the Guest Editors

Recently, land subsidence has become one of the important risk factors. Taking into consideration global warming and sea-level rise, many regions of the world, large cities, and land users will be affected by the changes. In many of those areas, the land subsides because of water pumping, gas, and oil extraction, soft soils or peat compaction and additional building load. Mining is also one of the most important factors of subsidence, sinkholes, and other related damage. It can affect buildings and infrastructure, threatening and decreasing quality of life. In any area transformed by human activity, the ground movements should also be considered. New ideas in modeling approach development, rock mechanics, and civil engineering have emerged in many countries. Novel measurement technics, sensors, and expanding availability of remote sensing data pushes the monitoring of land subsidence towards new possibilities. This Special Issue is intended for specialists and an interdisciplinary audience and covers recent advances in monitoring, prediction and modeling of land subsidence.

### Guest Editors

Prof. Dr. Ryszard Hejmanowski

Faculty of Mining Surveying and Environmental Engineering, AGH  
University of Science and Technology, 30-059 Cracow, Poland

Dr. Pietro Teatini

Department of Civil, Environmental and Architectural Engineering  
(DICEA), University of Padova, Padova, Italy

### Deadline for manuscript submissions

closed (27 May 2023)

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

---

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo  
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,  
20133 Milano, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
