Novel Approaches to Lipid Analysis

Message from the Guest Editors

Lipids have in the last few years become increasingly more important. This is due to the interest in the health aspects of lipids and their vital role in biological processes, e.g., as signaling molecules in living organisms.

For our understanding of the physiological and biochemical processes it is of paramount importance to know the molecular structure and properties of the various lipids. To elucidate this, there are many different analytical tools that can be utilized.

This Special Issue provides an opportunity to the scientific community to present research that uses different types of analytical instrumentation for complex structure elucidation of all kinds of lipids. Both instrumentation used in routine analysis and for research purposes only are of interest in this Special Issue.

Guest Editors

Prof. Dr. Dag Ekeberg

Faculty of Chemistry, Biotechnology and Food Science, Norwegian University of Life Sciences, Ås, Norway

Dr. Hanne Devle

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
