

Special Issue

Mass Spectrometry and Analytical Techniques in the Environment

Message from the Guest Editor

This Special Issue will publish contributions from researchers in the field of mass spectrometry applied to the environment, which review and discuss the most current methodologies used for the identification of contaminants and their transformation products.

Particular emphasis should be focused on new methodologies that involve pollutant transformation and identification/characterization procedures involving mass spectrometry. I would like to invite you to submit original research papers to the Special issue "Recent Developments in the Relationship between Mass spectrometry and Environmental Studies".

Guest Editor

Prof. Dr. Maria Helena Florêncio

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
