

## Special Issue

# Feature Review Papers in Additive Manufacturing Technologies

### Message from the Guest Editors

Additive manufacturing (AM), also known as three-dimensional (3D) printing, is a technology that has been widely used to create complex 3D structures out of a digital model. 3D printing technology has revolutionized various industries from electronics, defense, and aerospace to biomedical applications. There have been rapid developments and utilizations of 3D printing technologies in medicine, ranging from orthopedics, maxillofacial surgery to cardiovascular and other health care areas. Advancements in 3D printing technologies, coupled with the greater accessibility of 3D printers, declining costs, and the evolution of biomaterials, have significantly enhanced the application of 3D printing within the medical field. This includes areas such as physician support, medical education, and the planning of treatment procedures.

## About the Journal

### Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

### Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo  
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,  
20133 Milano, Italy

---

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

#### Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering )
