

Special Issue

Diagnosis and Therapy for Retinal Diseases

Message from the Guest Editor

This Special Issue focuses on the latest advancements in the identification, assessment, and treatment of retinal disorders. It aims to cover a broad range of topics, including innovative diagnostic techniques, emerging therapeutic approaches, and the underlying pathophysiological mechanisms of retinal diseases. Contributions may include original research, reviews, and clinical studies that provide insights into improving patient outcomes, enhancing diagnostic accuracy, and developing novel treatments for conditions such as diabetic retinopathy, age-related macular degeneration, and other retinal pathologies.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
