

Special Issue

NMR Techniques for Solids and Soft Systems

Message from the Guest Editors

This special issue will focus on the development and application of NMR techniques for the investigation of solid and soft systems. The following is a non-exhaustive list of subjects of interest:

- Liquid and plastic crystals;
- Polymers and composites;
- Food and biomacromolecules;
- Drugs;
- Porous materials;
- Membranes;
- Inorganic and hybrid materials;
- Nanostructured and 2D materials;
- Biomasses and soils.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.
