Special Issue

Plastic and Microplastics in Environmental Pollution

Message from the Guest Editor

This Special Issue is focused on the occurrence, characterization, and fate modelling of micro- and nanoplastics in the environment; the role of micro- and nanoplastics as transport vectors for organic pollutants; and improving understanding of the occurrence and impacts of plastics in the environment with new analytical tools. Keywords

- microplastics
- nanoplastics
- monitoring
- aging
- coupling

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multidimensional network.

Editor-in-Chief
