

Special Issue

Nanoparticles in Sensing and Labelling

Message from the Guest Editor

This Special Issue will reflect the state-of-the-art in this field and discuss new promising strategies for synthesis and application of micro- and nanoparticles in physics, chemistry, material development, biomedicine, and cell technology. Keywords

- nanoparticles
- particle synthesis
- labeling
- sensing
- signal transduction
- surface functionalization
- composite particles
- multicomponent particles
- particle-based communication

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
