

Special Issue

Numerical and Analytical Methods in Electromagnetics

Message from the Guest Editor

Like all branches of physics and engineering, electromagnetics relies on mathematical methods for modelling, simulation, and design procedures in all of its aspects (radiation, propagation, scattering, imaging, etc.). The lists above are by no means exhaustive; there is a plethora of additional algorithms, having evolved particularly over the last few years, designed to reduce the complexity and simultaneously improve the accuracy of calculations. In this Special Issue, the most recent advances thereof will be presented, to illustrate the state of the art in mathematical techniques in electromagnetics.

Guest Editor

Prof. Dr. Hristos Anastassiou

Department of Informatics Engineering, Technological and Educational Institute of Central Macedonia at Serres, End of Magnisias Str., GR-62124 Serres, Greece

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
