Advances in Reconstruction Dentistry

Message from the Guest Editors

Reconstructive dentistry is a modern direction of the development of different procedures in dentistry. It encompasses prosthodontics, periodontology, and oral and maxillofacial surgery. Reconstructive dentistry means different things in every specialization, but the ability to use modern devices for planning and preparing white and red esthetics provides the possibility for the reconstruction of hard and soft tissue. We invite you to send any form of research article or review presenting different aspects of reconstruction in dentistry.

keywords

- reconstruction
- restorative dentistry
- cad-cam
- milling
- regeneration
- customized treatment
- white esthetics
- red esthetics

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPlus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
