

Special Issue

Organic and Hybrid Photovoltaics

Message from the Guest Editor

Organic and hybrid photovoltaics (PVs) have been a thrilling area of academic research for the past 30 years. Due to this extensive quest for new materials, it does not come as a surprise that the most promising PV technology to date, namely, the perovskite solar cell (PSC), emerged serendipitously from the application of perovskite materials to solid-state DSSCs. In this Special Issue we, therefore, aim at giving a comprehensive view on the recent developments of DSSCs, OPVs, PSCs from a material perspective. Subject areas would include, in a broad sense, PV material synthesis/fabrication (inorganic and organic/polymer), device fabrication and the study of their electrical and photophysical properties. The publication can be in the form of communications, research articles or review articles according to the applied sciences publication templates. Authors who are experts in these fields are invited to submit their contributions for this Special Issue by the end of December 2021.

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal Applied Sciences has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (General Engineering)
