

Special Issue

Intelligent Fault Diagnosis and Prognosis for System Health Management

Message from the Guest Editors

This Special Issue focuses on intelligent techniques for system reliability and safety. As modern systems grow more complex, traditional methods fall short. We seek contributions exploring novel ways in intelligent fault diagnosis using AI, machine, and deep learning. Works on developing prognosis models for early failure prediction are also welcome. Articles may cover diverse applications ranging from industrial systems to aerospace engineering.

Assistants

Guest Editors

Prof. Dr. Jian Ma
Dr. Hualiang Wang
Dr. Jinsong Zhao

Deadline for manuscript submissions

20 July 2026

About the Journal

Message from the Editor-in-Chief

As the world of science becomes ever more specialized, researchers may lose themselves in the deep forest of the ever increasing number of subfields being created. This open access journal *Applied Sciences* has been started to link these subfields, so researchers can cut through the forest and see the surrounding, or quite distant fields and subfields to help develop his/her own research even further with the aid of this multi-dimensional network.

Editor-in-Chief

Prof. Dr. Giulio Nicola Cerullo
Dipartimento di Fisica, Politecnico di Milano, Piazza L. da Vinci 32,
20133 Milano, Italy

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), Ei Compendex, Inspec, Embase, CAPIus / SciFinder, and other databases.

Journal Rank:

JCR - Q2 (Engineering, Multidisciplinary) / CiteScore - Q1 (Fluid Flow and Transfer Processes)
